ALWAYS SOW MANNS' SUPERIOR LAWN GRASS

For Beauty and Permanence

Lawn Grass Seed is not a distinct standard variety which can be sold at a standard market price, but is a mixture containing many varieties blended to meet certain requirements. The price is determined entirely by the value and proportions of the various grasses used in the mixture.

Cheap lawn mixtures are the most expensive to sow because they contain only a small percentage of high germinating seed of the desirable varieties and large proportions of the cheap, undesirable grasses and chaff.

Manns' Superior Lawn Grass Seed is a correctly proportioned mixture of the very best varieties of grasses blended according to a formula which has resulted from many years of study and experience. Every variety included has its special duty to perform in the quick production and steady maintenance of a beautiful and permanent lawn.

MANNS' SHADY PLACE LAWN SEED

Contains only those grasses which are best adapted for growing under trees and in shaded spots. It quickly produces an abundant and even growth of beautiful grass, harmonizing in color and general appearance with our regular Superior mixture.

MANNS' EVERGREEN LAWN SEED

Is a good, clean mixture of high germinating stock, strictly pure and of low weed content. Not as permanent as our Superior mixture, but well worth the price.

*Be sure to ask us about Hyper-Humus
before making your lawn
improvements.*

ANNUAL FLOWER SEEDS

The ease of cultivation and the quickly effective results obtained from Annuals make them indispensable, as they are adaptable to an almost endless variety of arrangement.

Even in perennial borders, beds and rock gardens, annuals are very essential to bridge the span between periods of bloom of the perennials and to give desired color effects which are possible only with annuals. Many varieties can be started indoors early and transplanted giving continuous bloom from early summer until frost. Some sorts are very easily grown in late summer to produce plants for the sun-parlor or conservatory where they will blossom during the winter.

Annuals bloom more profusely than biennials or perennials because it is not necessary for them to store up food or build root systems for succeeding years; their business being to produce flowers and seeds abundantly the first year. For this reason it is advisable to cut the flowers before going to seed so that the plants will continue to bloom freely.

For Variety, Color, Fragrance, Economy Sow Annuals.

AGERATUM

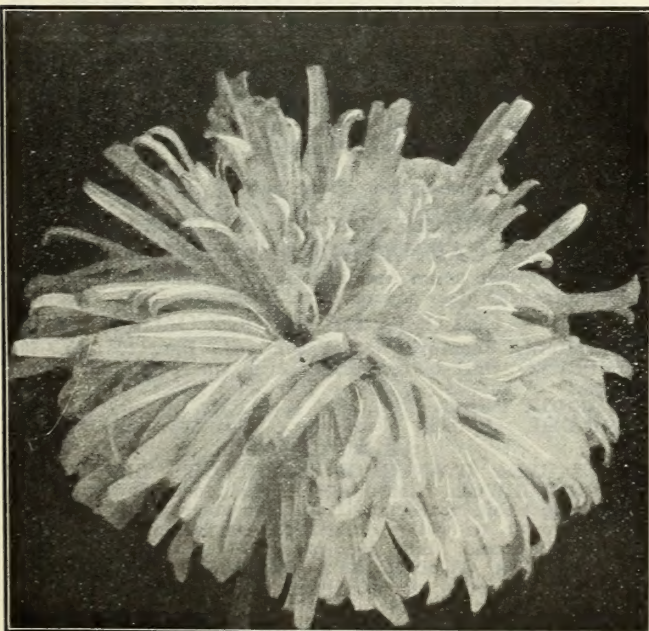

*Splendid for bedding or pot culture, covered from June until frost with a mass of very attractive flowers of a tufted appearance. Very effective when contrasted with geraniums. Large-flowered White, large-flowered Blue or Mixed. Pkt., 10c; oz., 75c. Dwarf Varieties. Pkt., 10c; ¼ oz., \$1.50.

AGROSTEMMA—Rose of Heaven

COELI-ROSEA. A very showy old time favorite greatly admired; excellent cut flowers, grows 12 to 15 inches; blooms early. Color bright rose pink. Pkt., 10c; oz., 50c.

ALYSSUM

*Sweet Alyssum. Little Gem. Very popular border flower, coming into bloom six weeks after planting seed and requiring the least attention of all flowers. Very erect and dwarf, its white flowers greatly enhancing the beauty of any bed or border. Height 4 inches. Pkt., 10c; oz., 50c.

ANTIRRHINUM OR SNAPDRAGON

This border and bedding plant of long blooming season is now one of the best perennials suitable for flowering as an annual. The long showy spikes of curiously-shaped tubular flowers with spreading lobes and finely marked throats are fragrant as well as brilliantly-colored. They are very desirable for cutting as the blooms are borne well above the dark glossy leaves and keep fresh for a long time.

Giant Mixed, pkt., 10c; ¼ oz., 60c; oz., \$2.00. Tall Mixed and Semi-Dwarfed Mixed, pkt., 10c; ¼ oz., 50c; oz., \$1.50. SEPARATE COLORS: White; Appleblossom, (pink and White); Coral-Pink; Defiance (Scarlet); Fascination (deep flesh pink); Wallflower (Yellow Bronze); Luteum (Canary Yellow). Giant Type, pkt., 10c; oz., \$3.00.

ASTERS

Very popular because of their beauty and ease of culture. The varieties listed represent the finest Asters of the early, midseason and late types and will give a profusion of bloom from July to late October. Asters require good rich soil and during the growing period should be well supplied with water.

CALIFORNIA SUNSHINE. Flowers measure from 4 to 6 inches in diameter are half double and exhibit all the grace and beauty of the single Aster. The golden yellow ground tone of the quilled petals contrasts wonderfully with the outer petals. Forms a loosely curled circle which makes the flowers pleasing to the eye, fine for cutting. Mixed, pkt., 10c; ¼ oz., 75c.

QUEEN OF THE MARKET. Branching habit, 1 foot high, large flowers borne on long stems, blooming in July. Mixed colors, pkt., 10c; ¼ oz., 25c; oz., 75c.

GIANT COMET. Very distinctive, the outer petals being broad, flat and reflexed, while the center of the flower has a feathery appearance. Follows Queen of the Market in season and grows 12 to 24 inches high. Deep scarlet, dark blue, light blue, delicate yellow, snow white and rose. Pkt., 10c; ¼ oz., 35c; oz., \$1.25. Mixed, ¼ oz., 20c; oz., 65c.

CREGO. Flowers of immense size, 4 to 5 inches in diameter borne on very long stems. Plants are of strong branching growth, 2 to 2½ feet high. Separate colors, pkt., 10c; ¼ oz., 40c. Mixed, pkt., 10c; ¼ oz., 35c.

LATE BRANCHING. A handsome and very distinct variety resembling Japanese Chrysanthemums. The plants grow 1½ feet in height and width and the large full petaled blossoms are borne on long stems or branches. Comes into lower ten days later than other asters. Separate colors, pkt., 10c; ¼ oz., 35c. Mixture, pkt., 10c; ¼ oz., 30c.

AMERICAN BEAUTY, Giants of California. Mixed, pkt., 10c; ¼ oz., 50c.

Arctotis

Didiscus

Dianthus

AMARANTHUS

Very useful in borders of tall plants, among shrubs, or in centers of large beds. One type has large feathery plumes or sprays of rich crimson coloring while the other is grown exclusively for the brilliant-colored leaves.

CAUDATUS. (Love Lies Bleeding.) Plants of erect growth three to four feet high producing numerous feather sprays of rich crimson color. Pkt., 10c; $\frac{1}{4}$ oz., 35c.

MOLTEN FIRE. Very ornamental and beautiful; 4 feet tall; easily grown, leaves dark bronze, top of plant and centers of lower leaves, brilliant Poinsettia red. Pkt., 10c; $\frac{1}{4}$ oz., \$1.00.

SALICIFOLIUS. (Willow-Leaved or Fountain Plant.) Grows two to three feet high, with long hanging flower heads and foliage of a deep purple coloring. Pkt., 10c; $\frac{1}{4}$ oz., 40c.

SPLENDENS. (Rainbow Plant.) Beautiful variegated foliage with large crimson flower heads. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

TRICOLOR. (Joseph's Coat.) Similar to Splendens, having a single erect stalk of brilliantly colored foliage. Pkt., 10c; oz., 35c.

ARCTOTIS (Blue-Eyed African Daisy)

GRANDIS. White petals tinged lilac with centers steel blue. A splendid and easily grown flower, 2 feet tall. Good for cutting. Pkt., 10c; oz., 75c.

Calendula

ANCHUSA (Summer Forget-Me-Not)

CAPENSIS, ATROCOERULEA. A fine blue flower through late spring, summer, and fall. Easily grown. Height 2 feet. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

BLUE BIRD. Vivid indigo blue, plants compact and of even growth. Stems about 18 inches. Pkt., 10c; $\frac{1}{4}$ oz., 75c.

SWEET PEAS

CALIFORNIA GROWN

SUCCESSFUL EVERYWHERE

One ounce for 50 feet of row.

THE SPENCERS are of exceptionally large size, the petals waved and frilled and the general effect remarkably graceful and effective. The plants are of vigorous growth and remain in bloom for a longer time than the Grandiflora sorts.

CULTURE.—Grow named varieties of the colors you like best; know them by name in your garden and you will derive much more pleasure from them. Early in the spring make a trench three to four inches deep in rich, mellow soil, so arranged that no water can stand in it and plant the seed in the bottom, covering at first only one inch deep. When the plants are two inches high, cultivate; and as they grow, gradually fill in the trench. When the plants are about five inches high they should be supported by poultry netting, strings or brush. Water should be applied thoroughly once or twice a week early in the morning or in the evening. The blooms should be picked before they form pods or the plants will soon stop flowering. The following have been selected from hundreds of varieties, as being those of the highest quality in their respective classes.

***ALPINA.** An excellent early blooming dwarf perennial, covered with a mass of white flowers. It makes a fine border to taller perennials. Blooms during April. Pkt., 10c; oz., 75c.

Perennials are used extensively in old fashioned gardens, hardy borders and rock gardens. They are easily grown and when once established become increasingly beautiful year after year. Care should be taken in selecting varieties according to their color, height and season of bloom.

The seeds may be sown indoors or in hot beds early in the spring and transplanted to their permanent locations when three or four inches tall. Very satisfactory results can also be obtained by sowing the seeds early in August and shading from excessive heat by using lath or burlap screens. It is well to give young plants winter protection the first year.

The following list includes those varieties which are most popular because of their beauty, usefulness and adaptability to local climatic conditions.

ARMERIA—Sea Pink

VIRGINIA. Flaming scarlet; large, massive flowers, many open at a time, making a gorgeous display of dazzling red; good forcer.

GLADIOLI

Plant Manns' Gladioli Bulbs. They are strictly 1½ inch or more in diameter, sound, true to name, and can be absolutely depended upon to produce large, beautiful well-formed blooms.

Cultural Suggestions: Set bulbs 4 inches deep and 6 inches apart, either in rows or massed in beds, borders or among shrubbery. Successive plantings from April to July will bloom from July until frost. They will thrive in any good garden soil, but a sunny location is best. Cultivate frequently and water freely while blooms are forming.

AFLAME. Orange-red of immense size.

AVE MARIA. Light blue with deep purple blotch.

BELINDE. Creamy yellow, very large.

BETTY NUTHALL. Beautiful salmon pink with yellow throat, florets of fine texture and placement. A tall and straight grower.

CAPTAIN BOYNTON. Massive lavender with maroon spot in the throat. A large show flower, tall spike, very choice. Midseason.

CHARLES DICKENS. Beautiful purple violet. A very good grower with large flowers on tall spikes.

CRIMSON GLOW. Rich glowing velvety crimson, shaded deeper in the center; tall, strong grower; flowers well placed; considered the best in its color.

DR. F. E. BENNETT. Peach red, overlaid with flame scarlet, throat speckled ruby and creamy white. Flowers of large size and on strong stem.

GIANT NYMPH. Light rose pink, with creamy yellow throat. A very large wide open flower well arranged on strong stem.

GLORIANA. Finest golden salmon with pure yellow throat. Many well opened flowers at a time on straight, strong and tall stems.

GOLDEN DREAM. Pure golden yellow. One of the leading cut-flowers.

ROSE BUSHES

DORMANT SEAL KRAFT ROSES

(Carried in stock during March, April and May)

The three following grades are prepared by a special wax-coating process which thoroughly seals the entire plant (roots and branches) against evaporation. This assures complete preservation of all the original vitality and makes possible the early luxuriant growth and sure blooming quality for which these Northern grown bushes are noted.

GOLD SEAL. 50c each; 10 for \$4.50.

CHARLES K. DOUGLAS. Scarlet in color and slightly fragrant. A strong grower and one of the best red roses for the garden.

CHAS. P. KILHAM. Large, brilliant oriental-red, flushed with orange and glowing scarlet; a very vigorous and prolific bloomer.

DAME EDITH HELEN. A free flowering sweetly scented rose of clear pink color and very shapely buds.

E. G. HILL. Bright scarlet shading to a deeper red; high centered, very vigorous and free flowering.

ETOILE DE HOLLANDE. Brilliant red flowers of large size, very fragrant, vigorous and healthy grower.

GOLDEN EMBLEM. A most beautifully clear yellow, wonderfully well shaped buds on long stems.

JOANNA HILL. Long, rich apricot blooms with a suggestion of bronze. Strong grower, beautiful foliage.

LADY ASHTOWN. Extremely beautiful flowers of pale carmine-pink, shading to golden yellow at base of petals. Blooms are large, globular and well formed.

LADY MARGARET STEWART. A lovely new rose which has won praise from those who have grown it; of pleasing golden yellow color.

MEVR. G. A. VAN ROSSEM. Golden salmon and light orange. Free flowering.

MISS ROWENA THOM. Blending of brilliant pink mauve and old gold. A vigorous upright grower and a profuse bloomer.

MISS WILMOT. New everblooming pure white, superior to the older white varieties in form and habit of growth.

MRS. E. P. THOM. Long slender buds, opening into perfectly shaped blooms of lemon-yellow, sweetly scented.

MRS. HENRY MORSE. One of the best light pink varieties; high centered flowers of two contrasting tones of pink. Free flowering, and very fragrant.

MRS. LOVELL SWISHER. Good bloomer. Gorgeous salmon-pink and gold flowers, flesh pink at edges.

MARMION—(ID). One of the finest exhibition varieties with very large full flowers of splendid form. Color pure golden yellow with bronze suffusion on reverse of petals, having a deeper bronze tone in the center, good bloomer. Roots 50c.

DAHLIAS

Exhibition, Garden and Cut Flower Varieties

Dahlias do well in almost any kind of soil, but thrive best in a medium loam. The tubers should be planted in a horizontal position, with the sprout up and about four inches below the surface; they should be set three or four feet apart each way, in deeply spaded soil. Mulch with peat moss and allow only one shoot to stand. A good plant food applied just as the buds start to form will increase the size and improve the color of the blooms. If large exhibition blossoms are desired, it is absolutely necessary to disbud. After the frost has killed the flowers, the roots should be removed from the ground, allowed to dry for two or three days, and then stored away in peat moss in a cool, dry, dark place, where frost will not reach them.

KEY. C—Cactus. SC—Semi Cactus. ID—Informal Decorative. FD—Formal Decorative.

MRS. I. De Ver WARNER—(FD). Vigorous grower on splendid stems; true to type; fine form, orchid lavender. Roots 25c.

OMAR KHAYYAM—(FD). One of the best exhibition varieties but equally valuable for garden and cut flower display. Color a rich Chinese red at the base of the petals shading to bright orange and tipped lighter. Roots 75c.

RUDY VALLEE—(SC rated 88). Chrome yellow centers, gradually shading to orange and reddish apricot. Large vigorous grower, one of the finest. Roots \$1.50.

TREASURE ISLAND—(FD rated 88). Bright orange yellow with rose and gold shading. One of the autumn shade varieties. Roots 35c.

PLEASE NOTE

We can also offer many of the older varieties, once leaders and still very beautiful. Roots 25c to 50c.

DAHLIAS, by F. F. Rockwell. Learn to know the different types of dahlias and their uses in your garden, how to plant and grow them, what fertilizers to use, how to control pests, how to harvest and store the tubers, grow for exhibition, and how to propagate and hybridize. Brief and practical. 65 illustrations, 80 pages. \$1.00.

DAHLIA SEED

Very satisfactory results are obtained from seed planted early indoors and transplanted permanently in May or June. With proper care the plants will bloom the same year. (See page 12.)

*Pyrox kills bugs
—prevents blights*

ALL you have to do to keep your farm crops free from leaf-chewing insects and fungus diseases is this: Mix Pyrox with water and spray. No need to waste time and effort mixing Bordeaux and arsenicals.

We recommend Pyrox because it will not clog the smallest nozzle. It comes out a fine mist and covers the foliage completely, sticking to the leaves even through the hardest rains. Insects die. Blight is prevented. Your farm has a chance to show what it really can do for you! There is a size of Pyrox to suit every need!

Nicotine Pyrox

If you have a garden patch, you will want a jar of the new Nicotine Pyrox—Standard Pyrox treated with Nicotine. It not only kills leaf-chewing insects, prevents blight and other diseases, as Standard Pyrox does, but it also kills sucking insects, such as aphis, thrips and leaf-hoppers. Standard Pyrox, of course, is designed for most commercial crops, but in the garden, where sucking insects do so much damage, you will want Nicotine Pyrox.

Just mix
Pyrox
with water—and spray.

UNITED STATES POULTRY NETTING

United States Poultry Fence is strictly a "NO SAG" fence, as the combination of line and mesh wires, closely woven, prevents any lengthening or narrowing between posts. In erecting U.S. Poultry Fence the line wires permit of being stretched to a high tension, which compels the fence to remain rigid and upright without anchoring it to a baseboard or top rail.

HOME FLOWER GROWING, by E. C. Volz. A real flower garden encyclopedia! It will teach you how to propagate and cultivate your plants, how to care for, fertilize, and maintain them. It tells how and when and where to grow flowers; what different kinds look like; how to plan indoor, outdoor, rock, and water gardens; how to prepare exhibits for a flower show; how to organize a garden club. 151 illustrations, 364 pages. **\$3.50**

GARDEN MAINTENANCE, by Ortloff and Raymore. How to prune, fertilize, spray, and care for flowers, trees, shrubs, and lawns. This is a book written for the home owner who already has a lawn and garden space; it does not presuppose a new garden or the complete rearrangement of existing plantings. **\$2.50**

HOW TO GROW ROSES, by Pyle, McFarland, and Stevens. Makes every step in the culture and care of roses so clear that any grower can understand it and succeed with them. A completely re-written edition of America's most popular rose book. 211 pages, 138 illustrations, including 45 varieties illustrated in color. **\$2.00**

GROUND TOBACCO STEMS

A finely ground, organic fertilizer material. An ideal and readily available source of necessary elements for your lawn, flowers, truck, market garden, and green house crops, and fruit. Better than stable manure, and makes a superior compost. Adds humus. Thoroughly sterilized, therefore free of weed seeds. Supplies ORGANIC Nitrogen and ORGANIC Potash. Does not burn tender roots. Economical, easy to use, and safe for every purpose. Guaranteed 1.25% Nitrogen, 4.50% Potash. Being a "natural" fertilizer carries nearly all of the minor elements that a plant demands, particularly Magnesium for flower and leaf color. Apply at rate of 5 to 10 pounds per 100 square feet, or 1000 to 2000 pounds per acre for all truck crops, tobacco, fruit, tomatoes, potatoes, etc. 10 lbs., 25c; 25 lbs., 50c; 100-lb. bag, \$1.50; ton, \$21.00.

PURE RAW BONE MEAL (Extra Fine)

An excellent fertilizer, especially recommended for lawns, rose bushes, grape vines, and deep-rooted shrubbery, where it is desired to furnish the plants with a perfectly safe, slow-acting but continuous supply of nourishment. Florists and nurserymen use large quantities of our bone meal very successfully. 10 lbs., 35c; 25 lbs., 75c; 50 lbs., \$1.35; 100-lb. bag, \$2.25. Let us quote special price on quantities.

PEAT MOSS

Promotes Growth by Improving Texture of Soils and Regulating Supply of Moisture Investigate its Many Advantages

Granulated Peat Moss has rapidly come into general use for horticultural purposes, and large commercial growers recommend it highly as a moisture retaining humus, unsurpassed for mulching. It is excellent for clayey, light, sandy or gravelly soils, beds, hotbeds, coldframes, greenhouse benches, in potting soil and as a winter protection for lawns. Also as a mulch on strawberry, perennial beds, roses, rhododendrons, azaleas, evergreens, ferns, etc.

VIGORO
 Complete plant food

Mr. W. E. Hartman of the National Academy of Sciences says: "I believe that **Hyper-Humus** is responsible for the general excellence of both lawn and plantings." For many years the U. S. Government has used **Hyper-Humus** in the landscaping and planting of many of its Public Buildings, Post Offices, and Parks. It meets the Government's standard for landscaping, and is approved for Government plantings in Washington and throughout the East.

Hyper-Humus

Humus makes rich loamy garden soil out of common dirt. Added in sufficient quantity it will give the soil the proper texture, help hold the right amount of moisture, and retain plant foods for natural plant stimulation.

AMOUNT TO APPLY PER SQUARE FOOT:
 NEW LAWNS, 1 to 3 lbs.; OLD LAWNS, 1 to 2 lbs.
 GARDENS AND FLOWER BEDS, 2 to 4 lbs.

In addition to the directions for general use, the following specially prepared Bulletins are available:

- How to Build a Lawn
- The Flower Garden
- Gardening with Rocks and Flowers
- Hyper Humus... First aid to Gardening
- Hyper Humus for Roses
- The Vegetable Garden

10 lbs. 35c; 25 lbs. 65c; 100 lbs. \$1.75; 500 lbs. \$7.50; 1000 lbs. \$10.00; ton \$17.50. Let us quote 5 ton and carload lots.

NOTE: It is suggested that you add 1 pound of an approved non-toxic plant food to every 10 pounds of Hyper-Humus.

- FIVE HYPER-HUMUS VALUES**
- 1 **Hyper-Humus** is literally a **workshop** for bacterial conversion. The millions of beneficial bacteria in **Hyper-Humus** gives life and fertility to your soil.
 - 2 **Hyper-Humus** is a **storage-house** of soil organics... plant food awaiting plant call.
 - 3 **Hyper-Humus** is a **reservoir** of normal moisture, assisting food conversion, and coming to the aid of your plants when they need it.
 - 4 **Hyper-Humus** is a **regulator** of temperature and air... so vital to plant life.
 - 5 **Hyper-Humus** has **perfect friability**... it is easy and pleasant to use; absolutely free from odor and from weed-seeds.
